

User Driven Access Changes Lifecycle Manager, Part 1

Fundamentals of IdentityIQ
Implementation

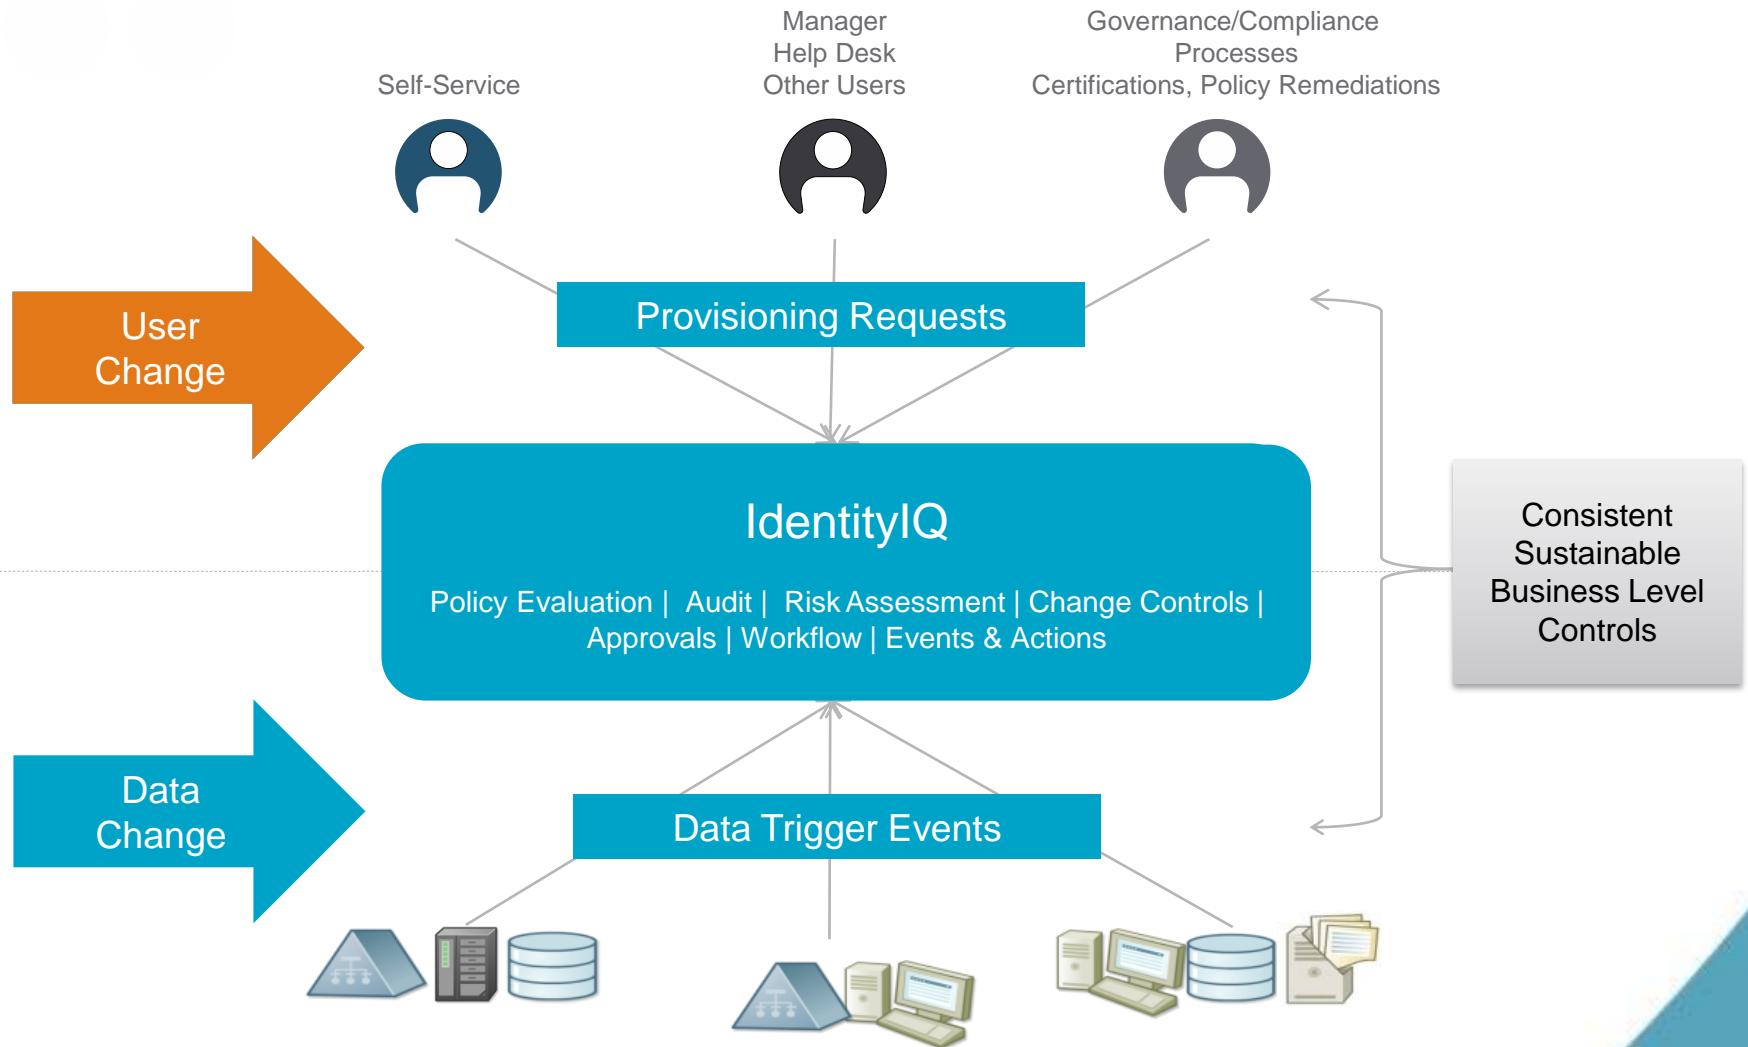

IdentityIQ 7.0

Overview

User Driven Access Changes

- Identity change lifecycle
- Key considerations
- Access request process
 - Requesting entitlements and roles
 - Requesting account, password, and Identity Cube changes
- Configuring access requests
 - Configuring quicklink populations
 - Configuring role and entitlement requests
 - Configuring account requests
- LCM Actions and their associated Business Processes
- Configuring provisioning policies

Identity Change Lifecycle

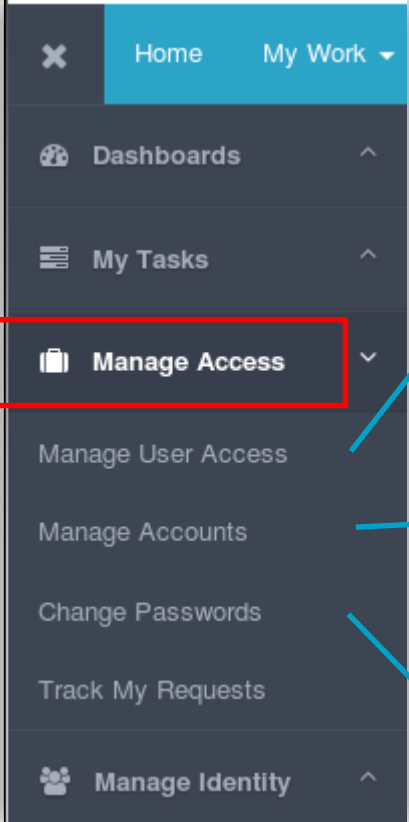

Key Considerations

- User-driven Changes: LifeCycle Requests
 - Who can make what kinds of requests for whom?
 - What workflow should run to fulfill the request?
- Data-driven Changes: Lifecycle Events
 - What data changes should be watched as trigger?
 - What workflows should run in response?

Access Request Process

Access Request Types

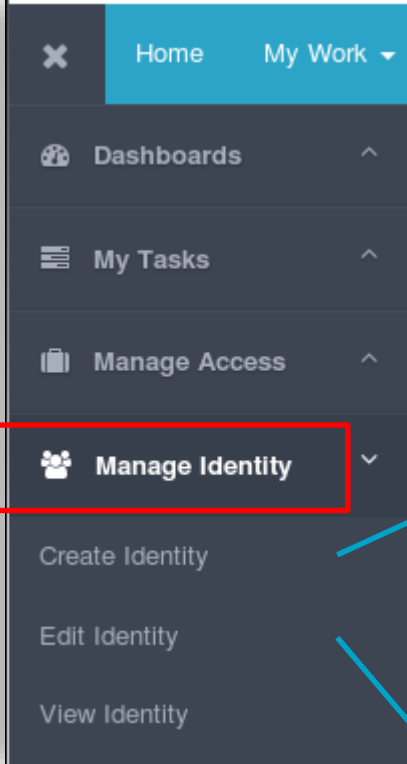

A screenshot of the SailPoint console's left-hand navigation menu. The 'Manage Access' option, represented by a briefcase icon, is highlighted with a red rectangular box. Below it, the expanded menu items are visible: 'Manage User Access', 'Manage Accounts', 'Change Passwords', 'Track My Requests', and 'Manage Identity'.

Add or remove *roles/entitlements*

Request, delete, modify *accounts*

Change *passwords* on managed systems*

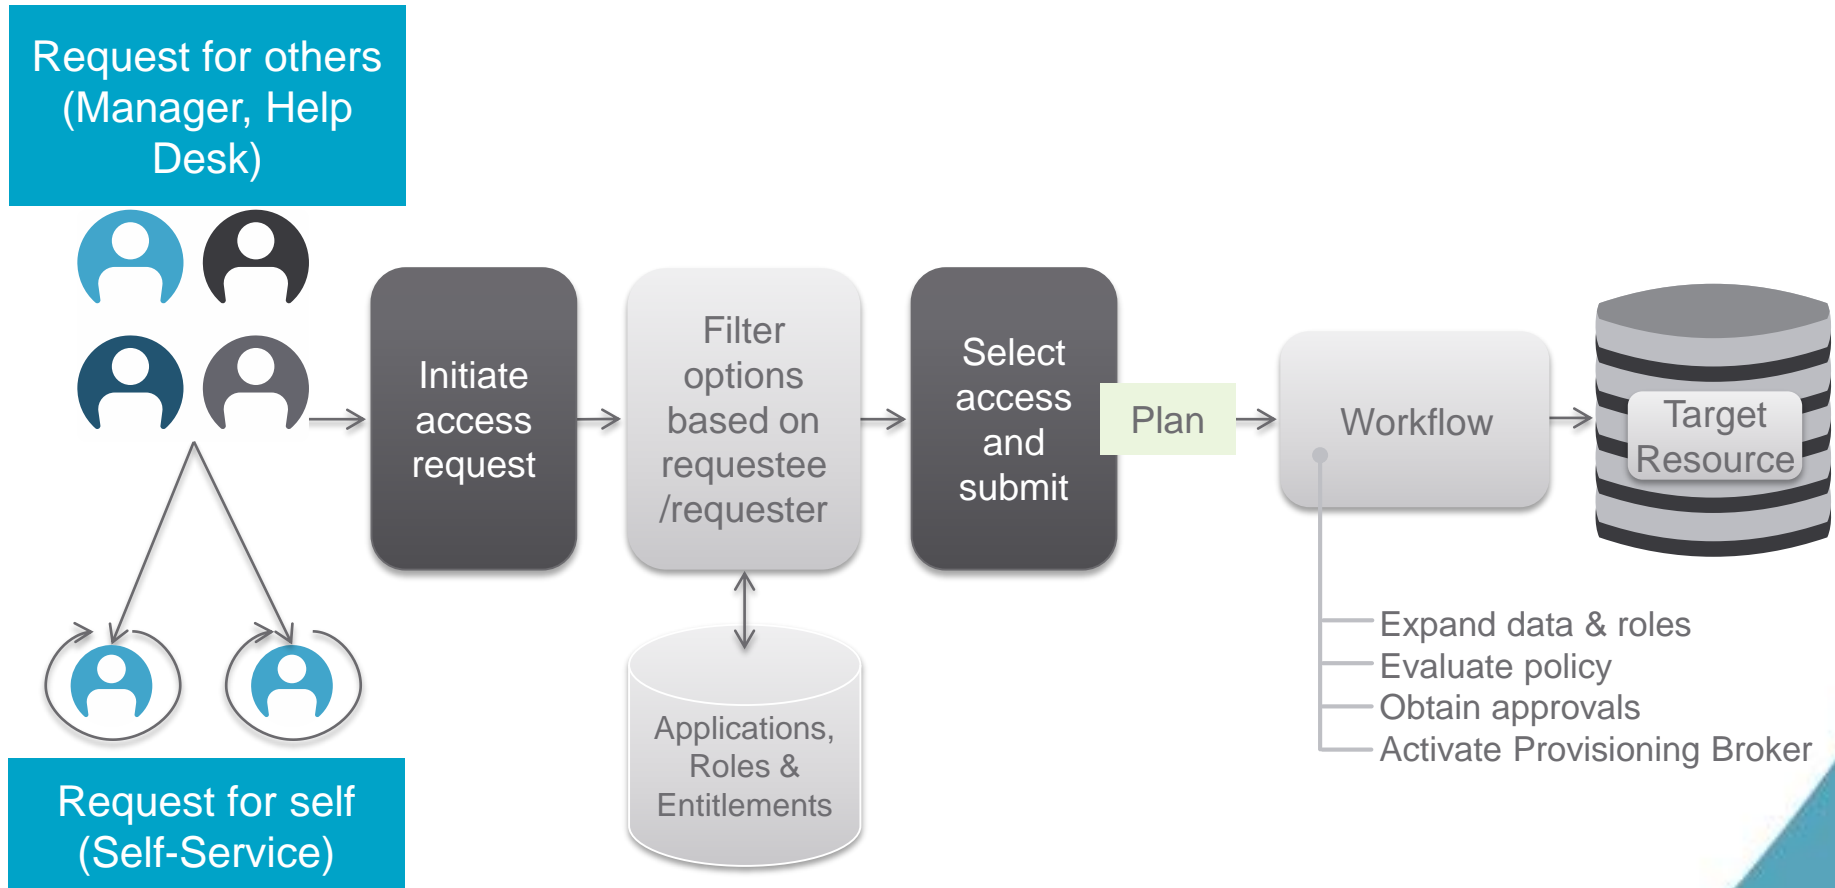

A screenshot of the SailPoint console's left-hand navigation menu. The 'Manage Identity' option, represented by a group of people icon, is highlighted with a red rectangular box. Below it, the expanded menu items are visible: 'Create Identity', 'Edit Identity', and 'View Identity'.

Edit *identity cube*

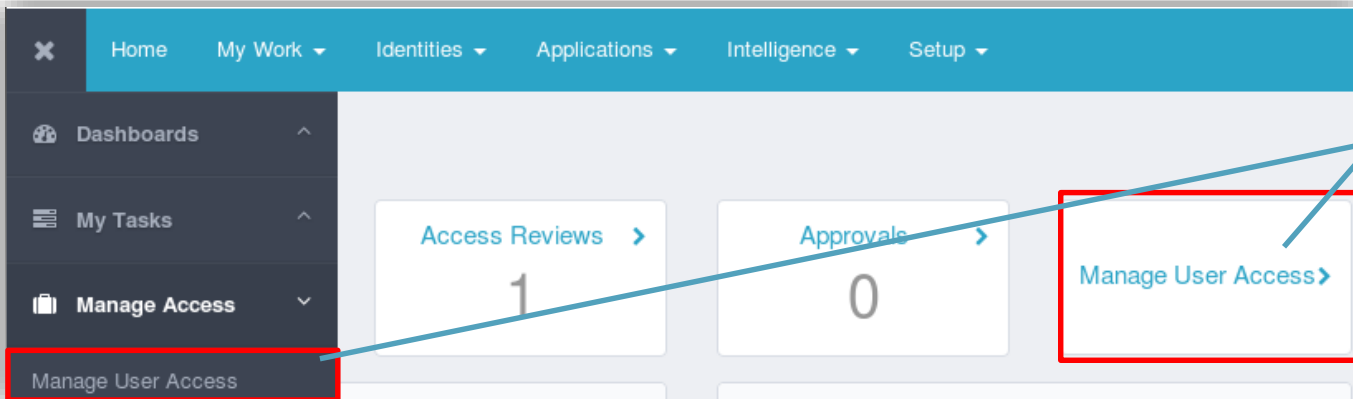

Access Request Process

Default Process

Entitlement/Role Access Change Requests

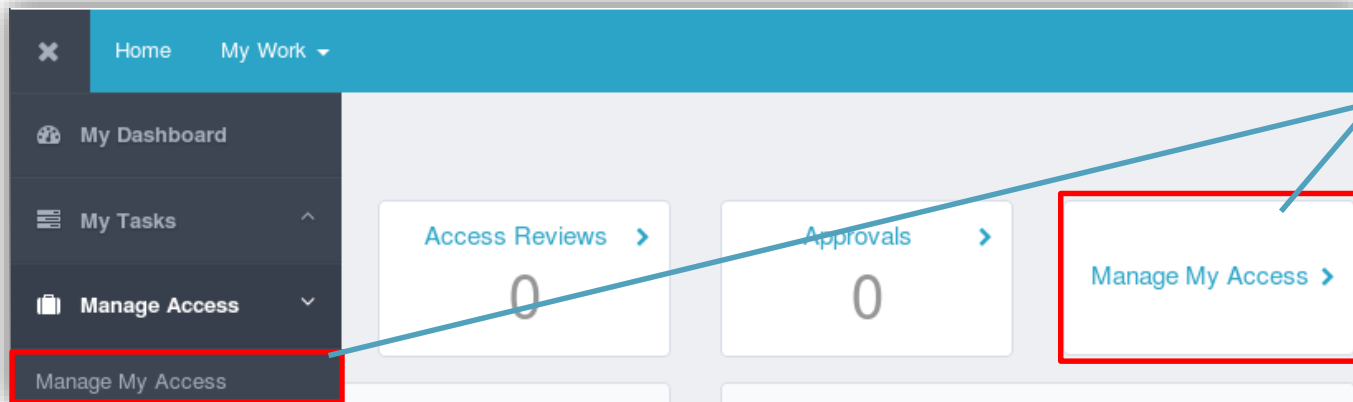

Submitting a Role/Entitlement Request

All users who can manage access for other identities
(Managers, Help Desk, etc.)

Quicklink Menu

Quicklink Card

All users who can manage access only for themselves

Submitting a Request

Select Users

- Self and/or others
- Driven by quicklink population configuration
- Filter identities on identity attributes, roles, applications

The screenshot displays the 'Manage User Access' interface. At the top, there are three tabs: 'Select Users' (active), 'Manage Access', and 'Review'. Below the tabs is a search bar labeled 'Search Users' with a magnifying glass icon. Under the search bar, it says 'Showing 1-8 of 8'. To the right of this, there are two buttons: 'All' and 'Filters'. Below these are three user cards, each with a checkmark icon and a user name. The first card is for Catherine.Simmons, with Username: Catherine.Simmons and Manager: Amanda.Ross. The second card is for Bob.Smith, with Username: Bob.Smith and Manager: Catherine.Simmons. The third card is for Denise.Hunt, with Username: Denise.Hunt and Manager: Catherine.Simmons. Each card also has a small user icon at the bottom left.

Submitting a Request

Searching by Keyword

The screenshot displays the 'Manage User Access' interface. At the top, there are three tabs: 'Select Users', 'Manage Access' (which is highlighted), and 'Review'. Below these tabs are two buttons: 'Add Access' and 'Remove Access'. A red box highlights the 'Search Access' input field, which contains a hamburger menu icon on the left and a magnifying glass icon on the right. Below the search bar, the interface shows a list of results. The first result is for 'Denise.Hunt' and is expanded. It shows a checkmark in a circle next to the word 'ACCOUNTING'. Below this, it says 'Accounting Group for PAM'. A red box highlights the attributes: 'Type: Entitlement', 'Application: PAM', and 'Attribute: Permission Group'. Below this, there is another result for 'AcctsPayable' with a checkmark in a circle. Below this, it says 'Type: Entitlement', 'Application: Financials', and 'Attribute: groupmbr'. A blue callout box points to the search bar with the text: 'Full Text Search (default) includes name, attributes, and description'. Another blue callout box points to the attributes of the first result with the text: 'Add role and entitlement extended attributes via UIConfig Entry Keys:'. A third blue callout box points to the attributes of the second result with the text: 'Remove attributes via UIConfig Entry Keys:'. The bottom of the interface shows the SailPoint logo and copyright information: 'Copyright © SailPoint Technologies, Inc. 2015 All rights reserved.'

Searching by Affinity

The screenshot shows the 'Manage User Access' interface. At the top, there are two tabs: 'Select Users' and 'Manage Access', with the latter being active. Below the tabs is an 'Add Access' button. A 'Population Search' section contains a 'Manager' dropdown menu, a 'Region' dropdown menu set to 'Europe', and 'Clear' and 'Apply' buttons. Below this, a green bar indicates 'Showing 1-12 of 17' results. The first result is for 'Denise.Hunt' with a checkmark icon. Below this, a section for 'Region.Europe' shows a green progress bar for '76 of 76 users - 100%'. Below this, a section for 'input' shows an orange progress bar for '52 of 76 users - 68%'. At the bottom, there is a summary bar with 'Type: Entitlement', 'Application: TRAKK', and 'Attribute: capability'.

- Search by *population attribute matching* or by *identity match*
- Available only to those who can request access for others
- Results show access for requested identity or population

Account, Password, and Identity Cube Access Change Requests

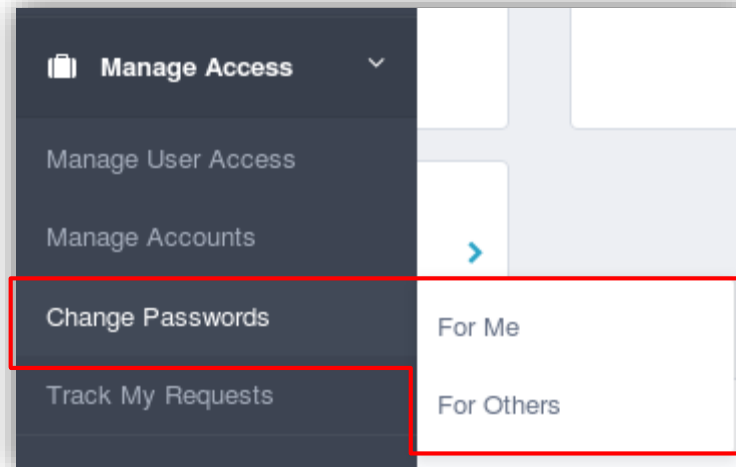

Managing Accounts

- Manage Existing Accounts
 - Enable, Disable, Unlock, Delete
- Request a new account (independent of entitlements)
 - One account or additional account
 - Configurable per application

Changing Passwords

- Generate or specify a password
 - Application password policy is enforced
 - Whose password a user can manage is configurable
 - Self
 - Direct reports
 - Others

Changing Passwords

Synchronize Password and Multiple Application Policies

- Enforces strictest combination of password policy criteria
- Identifies applications with conflicting policies

Select method for password change:

☒ Synchronize passwords for selected accounts

New Password: ?

Confirm Password:

Password Constraints
Password must have at least 1 digit(s)
Password must have at least 8 character(s)
Password must have at least 1 uppercase

Associate Business Processes

LCM Configuration

Associate Business Processes with Actions

The screenshot displays the Lifecycle Manager configuration interface. On the left, there are two main menu sections: **Manage Access** and **Manage Identity**. The **Manage Access** section includes options like **Manage User Access**, **Manage Accounts**, and **Change Passwords**. The **Manage Identity** section includes **Create Identity**, **Edit Identity**, and **View Identity**. The main area is titled **Lifecycle Manager** and has three tabs: **Configure**, **Business Processes** (selected), and **Identity Provisioning Policies**. Under the **Business Processes** tab, there is a table with two columns: **Action** and **Business Process**. The **Action** column lists several actions, with **Request Access**, **Manage Accounts**, **User Unlock Account**, **Manage Passwords**, **Edit Identity**, **Create Identity**, and **Self-service Registration** highlighted with red boxes. The **Business Process** column shows the corresponding process for each action, such as **LCM Provisioning** for **Request Access** and **LCM Registration** for **Self-service Registration**. On the right side of the interface, there is a **Welcome** message and a login form with fields for **Iam.New** and a password field, and a **New User Registration** link highlighted with a red box. At the bottom, there is a **Login** button.

Action	Business Process
Request Access	LCM Provisioning
Manage Accounts	LCM Provisioning
User Unlock Account	LCM Provisioning
Manage Passwords	LCM Manage Passwords
Edit Identity	LCM Create and Update
Create Identity	LCM Create and Update
